

# **PARKVIEW REVERSE RAFFLE**

(If you do not attend, you forfeit your dinners and the door prizes.)

## **Here's how it works:**

1. Before the raffle starts – go to the stage table, pull your number ball and give it to the attendant to place in the hopper.
2. 1<sup>st</sup> number drawn will get \$150.00 back. This number is now out of the vehicle raffle, but is still eligible for a door prize.
3. 19 more numbers will be drawn. These numbers will be placed in the door prize box, from which several door prizes will be drawn.
4. Door prizes need to be picked up immediately after each round or risk forfeiting before the last round.
5. Another 20 numbers will be drawn and placed in the door prize box, from which the next round of door prizes will be drawn.
6. Continue drawing rounds of 20 numbers and giving out door prizes for each round until there are 10 “Live” numbers left.
7. Before last 10 number round, there will be a last call for door prize pickup.
8. One of 10 “Live” numbers has been held out. It will be auctioned off at this time. Number goes to the highest bidder.
9. At this time, numbers will be drawn for remaining unclaimed door prizes.
10. Continue drawing numbers until 4 “Live” numbers remain. Those 4 remaining number holders are called to the stage and will be asked if they want to split \$10,000 or continue on for the grand prize. A unanimous vote is required to split the \$10,000. If all do not agree, the drawing continues. After each of the last 4 numbers is drawn, remaining participants can again decide whether or not to split the money.
11. **ATTENTION:** You must be present to win the vehicle. Also, you must be present in order to agree to split the money. If any one of the remaining number holders is not present, the drawing must continue. In the event that the person holding the last number drawn is not present, then that person will receive only \$5,000. That number is held out and ALL other numbers are placed back in the bin. Numbers will then be drawn one at a time for the remaining \$5,000. You must be present to win that remainder. If next number drawn is not present, it is held out and drawing continues for the remainder until someone present wins.
